## Mohawk Lifts

Hello All - Just a note on my  
system IA-10 Lift - ITS GREAT!!  
I look around for 3 months - talked  
to everyone that made a lift or  
owned one.

Spent much time on the Internet  
doing research on all lifts I  
could find - Nobody could tell  
me why theirs was better  
than any body's else.

So one day I was talking  
to a sales man from another  
lift manufacturer and he said  
Mohawk lifts was the best - kind  
of under his breathe - so as for  
me not to hear it - BUT I  
did hear him - said Thanks  
for talking to me and -  
Then went right to  
the Internet and looked up  
MOHAWK LIFTS - WOW!

And as they say - The rest  
is history

So I watched the video's  
- look at how they were  
made - WHERE they are made -  
and was really impressed of  
the construction - materials -  
how they are made - impressed  
me very much & - QUALITY  
MADE OF -

Also I noticed that they  
weight almost 6,000 lbs more  
than anyone else's lifts - meant  
that it is more sturdy -  
No twist - No bends - creaks  
etc - all steel - Big cylinders  
Big Rollers - Huge Foot Print  
Damn this things a Monster of

Then I found a chat room  
about cars and lifts -  
a lot of guys were asking  
about lifts and which ones to  
buy - Many of them owned  
other brands - Rotary - etc -  
Most said IF they had the  
money they would buy a  
MOTAWK 00

So I made a few calls  
to guys that had a Mohawk -  
all said they loved them -  
I talked to this one guy  
that's in the car repair business  
full time for almost 40 years -  
He has a Mohawk - and  
I asked him how he liked  
it - said he's had it for  
30 years or so - and has  
done nothing to it - except  
clean it. DAMN I say -  
That's quality!

He loved it.

So I call up my local  
distributor and I go see  
one - Boy it's big - heavy -  
thick steel - welded nicely -  
Falls about over built - just  
the way I would do it.  
Build it to last a lifetime  
with no problems - Now we're  
talking!

So I buy it - haul it  
back to my shop and  
my mechanic and I set  
it up - Took us about 8 hrs

From start to Finish -  
That's when we realised  
Just How Big and Heavy  
This Thing Is - NICE Very NICE!  
So It's been up about 2  
years Now - we just love It.  
So Nice to work under  
It - No wobbles about It  
twisting - bending - or formed  
sheet metal, spreading - - Just  
one solid Machine - GREAT!  
It operates very smoothly -  
NO jerks or jumping -  
Just top quality workmanship  
and you get two cans of  
touch up paint to keep  
It looking New - That was  
a surprise to have the paint  
included - nice touch!  
Also the Instruction Manual  
is excellent -

So in closing - No you can't  
have my lift back -  
No It's not for sale  
And I will never buy anything  
but a MOTTAW!  
Thank You

Wayne Andrews

P.S.

If you ever want to  
Send some one Buy to look  
at my lift - please do -  
Any body in my area  
that wants to buy one and  
wants to see it up and  
working -

I would be pleased to show  
them -

Wayne
